

CENTRAL OREGON MASTER GARDENER ASSOCIATION PLANT SALE 2017

Vegetables and Fruits

Broccoli-Green Magic Hybrid-buttery flavor with crisp texture on tight blue-green heads. Produces many lateral side shoots after terminal crown is harvested.

Cantaloupe-Minnesota Midget-prolific producer of 4" sweet fruit. good choice for Central Oregon's short growing season. Plant in a warm sunny location or against a heat retaining wall or rocks.

Cantaloupe-Halona-early fruiting 4#'s (only 9 seeds so may take off the list).

Cauliflower-Candid Charm Hybrid-cool season plant, white fruit.

Cucumber-Spacemaster 80-Setting good numbers of big, bitter-free slicing 8" cucumbers even in high heat. Developed by Cornell.

Eggplant-Hansel-glossy deep-purple finger shaped eggplant, grows up to 10" long, compact plants up to 3' tall. mild flavor with few seeds. All American Selection (AAS) winner.

Eggplant-Swallow Hybrid-similar in size, shape and color to Hansel Eggplant.

Kale-Tuscan Bay Leaf-best tasting for baby leaf salads when leaves are 4-5" tall, leaves continue to produce during the summer. bigger leaves steam or sauté.

Pepper-Early Jalapeño-very hot 3-4" conical shaped peppers, thick-walled fruit. AAS winner.

Pepper-Sweet Banana-yellow 6-7" fruit maturing to orange and red, excellent variety for short season climates. An old favorite and an AAS winner.

Pumpkin-Small Sugar New England Pie-excellent for baking with sweet dark orange 6# pumpkins.

Swiss Chard-Bright Lights-long tasty multi-colored yellow, orange, pink, purple stems. Harvest young 4-5" leaves and stems for salads and larger leaves and stems to steam or sauté. AAS winner.

Summer Squash Scallop-Sunburst Hybrid-yellow patty pan scallop shaped squash. AAS winner.

Summer Squash Zuchinni-Raven Hybrid-dark green cylindrical fruit, harvest when 5-8" long.

Watermelon-Bush Sugar Baby and Sugar Baby-both varieties are "ice-box" type small to medium in size, good variety for Central Oregon. Bush Sugar Baby grows vines 3-4' long and both varieties produce sweet juicy 6-8" diameter fruit. Plant in a warm sunny location or against a heat retaining wall or rocks.

Herbs

Basil-Opal-purple colored leaves, stems and flowers. Great for basil vinegar, salads & prepared dishes. Ideal for growing in containers. AAS winner.

Basil-Nufar Genovese-large dark green slightly textured leaves with a hint of Anise.

Parsley-Italian Flat Leaf-green leafed 10-12" plants. Harvest early summer to mid fall. Heat tolerant.

Tomatoes

Determinate varieties=bush growth, compact up to 4' tall, all fruit usually ripens over a 2 week period. Not to be pruned.

Legend-extra early sweet 2-3" red round fruit. One of the earliest slicing tomatoes.

Oroma-sauce and slicing type with red thick meaty wall, growing in clusters of 4-7.

Indeterminate varieties=vining growth, requires staking/caging & usually some pruning. Fruit ripens over a longer period of time.

Stupice-extremely early cold-tolerant of 2 oz. flavorful & sweet red tomatoes from Czechoslovakia.

Sun Gold Hybrid-very sweet bright orange cherry tomato growing clusters of 10-15 fruits.

Super Fantastic Hybrid-tall vigorous plants producing abundant harvests of large round juicy red fruit.

Sweet Million-improved version of Sweet 100, disease resistant, 4-6' tall vigorous plants producing clusters of red cherry tomatoes.
