

Tomato, Sweet 100s Cherry

Key Features

- Indeterminate
- Use raw in salads
- Do not refrigerate

Description

“Bursting with sugary flavor, Sweet 100s produce scarlet, cherry-sized fruits in long clusters right up to frost. You’ll definitely want to stake or cage these vigorous climbers to keep the fruit off the ground and avoid pests and diseases. These tomatoes need at least one inch (2.5 cm) of water per week and prefer six hours or more of direct sun each day.”
